

BIBLIOGRAPHY

Version 1.2

Books on Geometric Quantization:

SIMMS, D.J. - WOODHOUSE, N.M.J.: Lectures on Geometric Quantization
Springer Lect. Notes in Physics 53 (1976)

WOODHOUSE, N.M.J.: Geometric Quantization. Clarendon, Oxford
(1980)

ŚNIAŁECKI, J.: Geometric Quantization and Quantum
Mechanics. Springer (1980).

HURT, N.E.: Geometric Quantization in Action. Reidel (1983).

WALLACH, N.: Symplectic Geometry and Fourier Analysis. Math.
Sci. Press, Brookline (1977).

PUTA, M.: Hamiltonian Mechanical Systems and Geometric
Quantization. Kluwer (1993).

BYRLINSKI, J.-L.: Loop Spaces, Characteristic Classes and
Geometric Quantization. Birkhäuser (1993).

Books on Classical Mechanics and Symplectic Geometry

ABRAHAM, R. - MARSDEN, J.E.: Foundations of Mechanics. 2nd Benjamin,
Reading (1978).

MARSDEN, J.E.: Lectures on Mechanics. Cambridge UP (1992).

SOURIAU, J.M.: Structure des systèmes dynamiques. Dunod, Paris (1970)

LIBERMAN, P. - MARLE, C.-M.: Symplectic Geometry and Analytic
Mechanics. Reidel (1987).

ARNOLD, V.I.: *Mathematical Methods of Classical Mechanics*.
Springer (1976).

HOFER, H. - ZEHNDER, E.: *Symplectic Invariants and Hamiltonian Dynamics*. Birkhäuser (1994).

GUILLEMIN, V. - STERNBERG, S.: *Symplectic Techniques in Physics*. Cambridge UP (1984).

STRAUMANN, N.: *Klassische Mechanik*. Springer Lecture Notes in Physics 289 (1987).

MARSDEN, J.E. et alii: *Hamiltonian Reduction by Stages*.
Springer (2007). (free download possible)

Books on principle fibre bundles and more:

KOBAYASHI - NOMIZU: *Foundations of Differential Geometry*
1 & 2. Wiley (1963)

POOR, W.A.: *Differential geometric structures*. McGraw-Hill, (1981).

SHARPE, R.W.: *Differential Geometry*. Springer (1997).

BAUM, H.: *Eichfeldtheorie: Eine Einführung in die Differentialgeometrie auf Faserbündeln*. Springer (2009).

KIRILLOV, A.A.: *Elements of Representation Theory*. Springer (1976).

SCHOTTENLOHER, M.: *Geometrie und Symmetrie in der Physik*. Vieweg (1995).

ABRAHAM, R. - MARSDEN, J.E. - RATIO, *Manifolds, Tensor Analysis, and Applications*. Springer (1988)
